

CONTEENIUM

Which size fits my wrist?

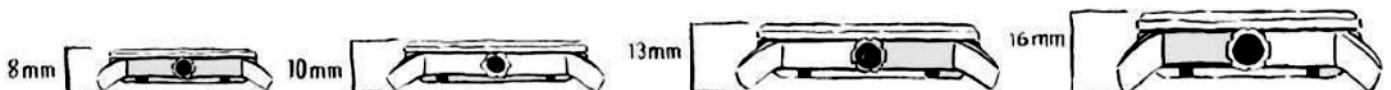

- 1 Download this PDF and print its pages in A4 format.
- 2 Check that this sign measures 10cm on the paper.
If the measurement is not correct, check your printer settings before retrying.

- 3 Cut out or wrap the image of your watch around your wrist.

Note: The diameter of round watches is equivalent to the width of rectangular watches

- 4 In addition to the size of the watch, its thickness should also be taken into account.
The thicker the watch, the more imposing it appears.

- 5 The style of the watch is also important. A classic watch is generally worn more slimly than a casual/sport watch:
